

ANZ Toolbox

Release Notes

Version 5.4.275.0 (19/03/2021)

Updates:

- Pavement Conformance Report (Advanced)
 - Added Point Code reporting option
 - Other minor improvements to report
- 12d Import/Export
 - Export Point ID to Vertex ID in 12d
 - Add deflection checking on import for poor geometry on 12d pipe data and places them on their own layer for review
 - Able to export “vertical tab” data from linestrings
 - Import “Grouped” string attributes
 - Export vertex attributes to a 12d super string for points attached to a linestring
- Insert Vertices from Points
 - Support CAD points now
 - Option for linestrings with “vertical tab” data
- Edit Linestring Elevation
 - Option for linestrings with “vertical tab” data
- Find and Replace Points
 - Minor enhancements

New:

Convert to Horizontal Linestring

- Convert linestrings containing vertical tab data to horizontal data only

Convert to Multiline Text

- Convert imported CAD Text to CAD Multiline text

Insert Alignment Table

- Insert Text Tables displaying alignment geometry data, both horizontal and vertical to a plan view

Insert Excel Table

- Insert a Text Table created from an excel document (csv) to a plan view

Note: To see the new commands on the ANZ Toolbox ribbon you may need to “Reset to Defaults” under “Support => Set Ribbon Tabs”. If you have a customised ribbon, then just add them manually.
