ANZ Toolbox

Release Notes

Version 25.1.2958.0 *(14/07/2025)*

<u>Updates:</u>

- 12d Import/Export
  - Changed the export so when exporting Feature attributes, it will remove any integer and real attributes when they have no values assigned.

<u>New:</u>

Adjust Profile

- The Adjust Profile command allows you to select one or many linestrings and apply a vertical adjustment to the profile of the string using serval different methods. This command is particularly useful for creating new strings allowing for Hog adjustment in bridge decks.
